WEVO™

WevoPBX For Your Current and Future Communication System

WevoPBX is scalable in terms of hardwares and softwares. The system uses standard server based hardware which can be upgraded to increase capacity. High availability feature is available to minimize down time and increase utilization.
Since it is IP based solution, you can link all your businesses to reduce cost and unify all of them.

What is WevoPBX

- WEVO Embedded Linux OS.
- IPPBX meet Unified Threat Management (UTM).
- Linux OS is based on well known robust distribution.
- Package as hardcoded firmware with upgradable & installable module features.
